Rose O. Sherman, EdD, RN, NEA-BC, FAAN

Interactive Virtual Leadership Workshop Tailored to the Needs of Your Organization

Nurses are often promoted into leadership with little or no understanding of the leadership and business skills needed to succeed in the role. They pick up pieces of the leadership skillset but are rarely given a game-plan for the basics that are required in order to make the transition into leadership. From leadership and communication to the business knowledge necessary to run a unit effectively, this one-day interactive workshop is designed to provide key skills necessary to be a successful nurse leader in any organizational setting.

Our topic areas include:

- Transitioning into a leadership role
- Effective communication and collaboration
- Coaching staff performance and development
- Creating healthy work environments
- Building effective work teams
- Navigating change
- Managing staffing and budget resources
- Developing a roadmap for ongoing leadership development
